Commune de Floreffe

Accueil

Bienvenue à Floreffe

Le site de la Commune de Floreffe fait peau neuve et se veut plus clair, plus pratique et plus complet afin d'offrir un maximum de services et d'informations au citoyen. Dans ce même souci de facilité de lecture, il est possible de modifier la taille des caractères en un clic sur le logo d'accessibilité.

Il vous sera bientôt loisible de parcourir des albums photos des activités dans la commune, de demander des documents en ligne, de consulter des pages personnelles d'associations...

Nous vous souhaitons une agréable visite!

Innovation: reports & studies

Studies released by the EU Commission

I. New model

*“**PloneGov** is a new model of programming and maintenance capacities for public sector open source activities”. www.publicsectoross.info*

2. Impact

*“**PloneGov** impact is unusual in terms of opportunity for innovation, standardization and economy of scale while gaining independence from large IT providers”. www.flossimpact.eu*

3. Open

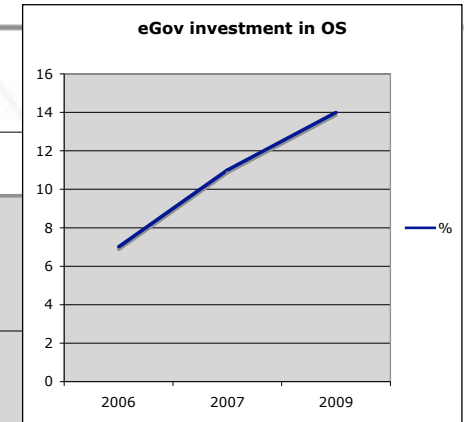

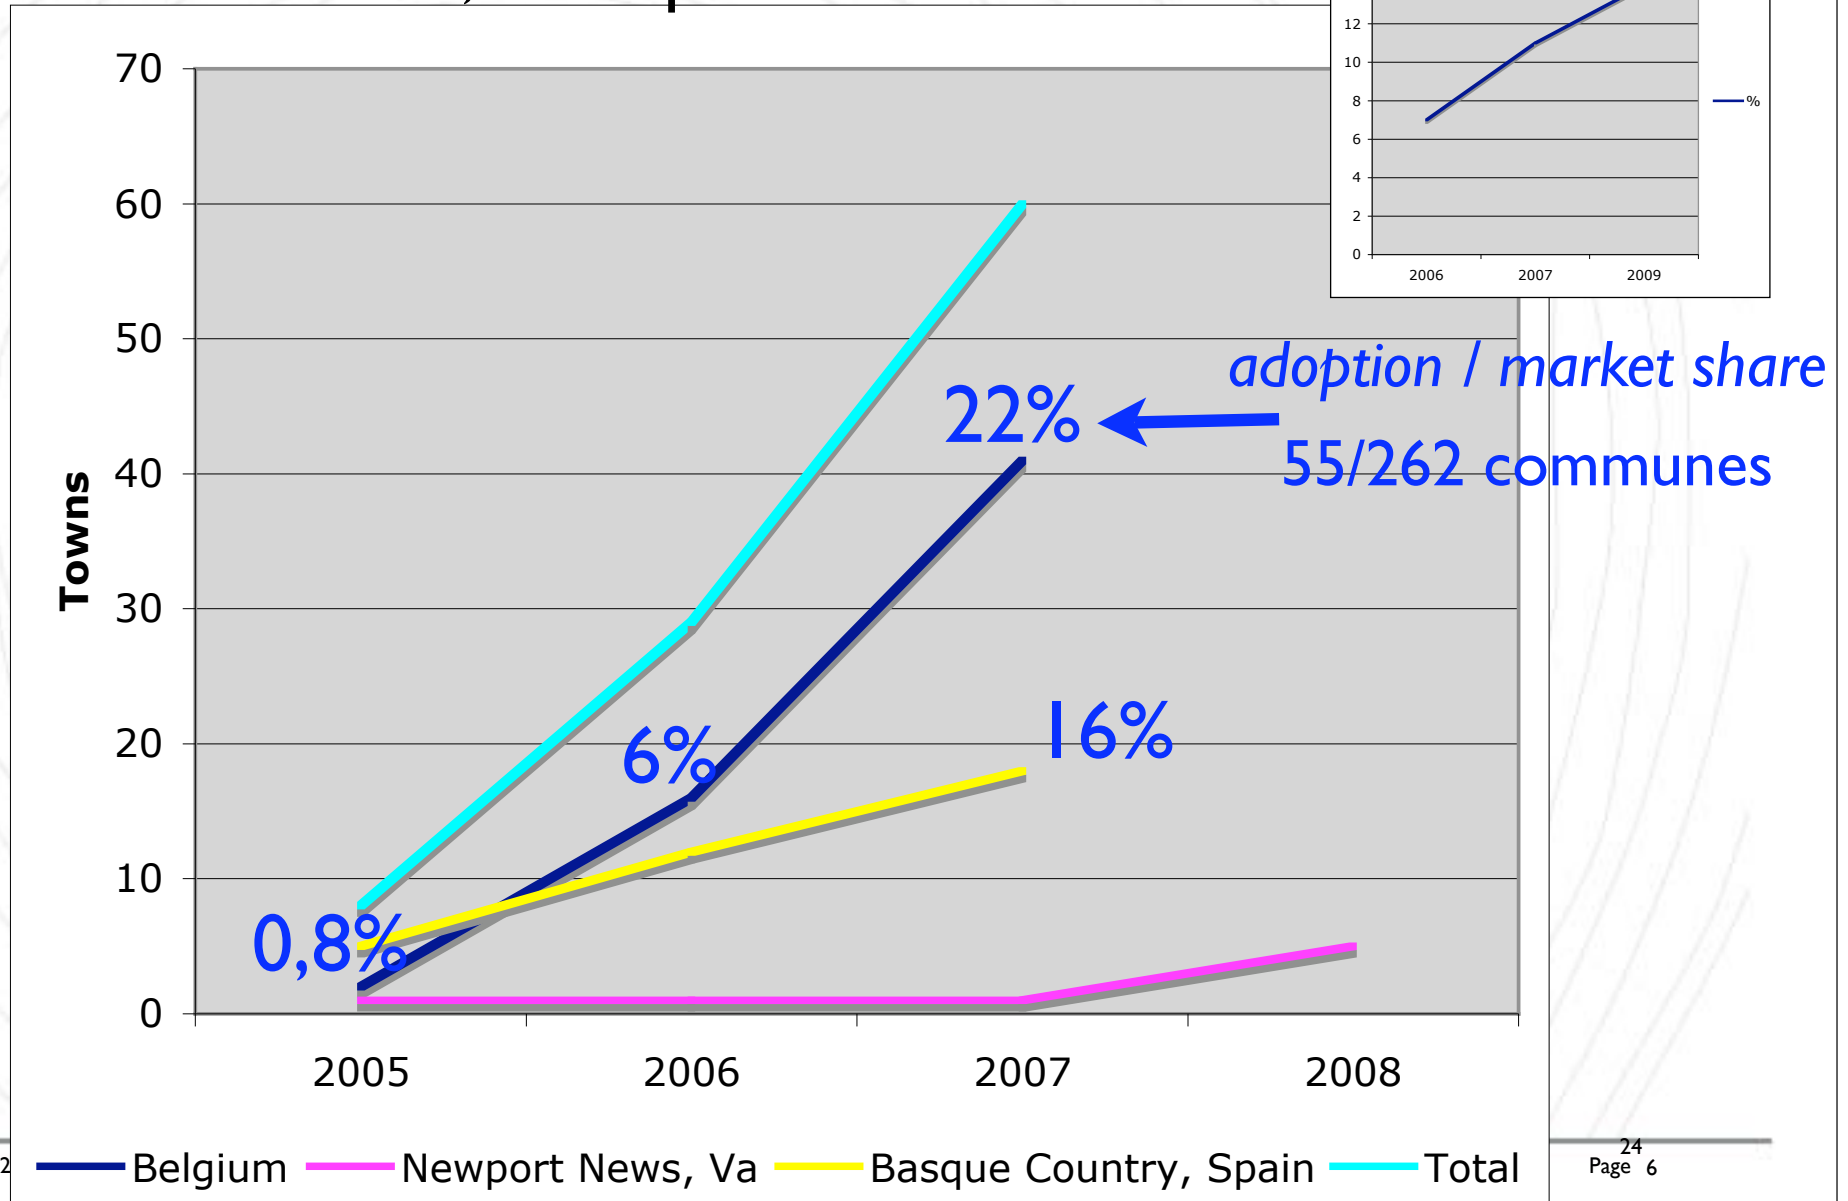

*“**PloneGov** model has a spatial – or in other words – societal – dimension right from the beginning, as it aims at integrating more and more municipalities and commercial partners across Europe” ... and the world.*

www.publicsectoross.info

Each new partner is a potential contributor

Amazing potential

Trends for 3 countries, same potential for all

Management

- National activities
- International activities

National activities

- Who? : **Public Sector and SME**
- Activities :
 - Technical development
 - Regional promotion
 - Services

International activities

- Who? : **Public and Non-profit**

- Activities :

- Operations and strategy -

- Technical coordination - (Public)

- Dissemination, communication, events -

- Business model -

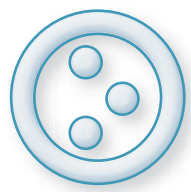

Conclusions

Collaboration is not only about code

- Technical -> methodology
- Software sharing -> planning, pooling budgets
- Dissemination: information and experience
- Transfer of knowledge
- Funding networking & collaborative activities

Funding programs

- EU FP7, INTERREG
- e-Government, eInclusion
- i2010 / ICT Policy Support Program
- North / South collaboration
- Economic development (SME)

PloneGov

▲ Up one level

www.plonegov.org

About PloneGov

Over 70 European, North and South American and African Public organizations participate in the PloneGov project. The goals of this close collaboration is to develop in a cooperative manner, applications and websites suited for public organization for their own use as well as for their citizens'. PloneGov strategy mainly rests on two renowned multiplatform Open Source tools: Plone and Zope.

[Read More...](#)

Awards

PloneGov award winning initiative is drawing attention from a broad range of organizations including European open source federations, American local governments associations or the European Commission. It highlights the positive impact and merit of such collaborative project, which are applicable in a broad sense to public organizations in any country.

[Read More...](#)

Subcommunities

PloneGov aims to create a platform of Plone based e-Government initiatives. We bring together different projects from different countries to develop collaborations in order to foster innovation and efficiency. They exist different distinct groupings within the PloneGov community. Each one addresses a different public, a different geographic area, a different line of business.

[Read More...](#)

References

This section lists local and regional governments involved in PloneGov project. All these public administrations develop by themselves, or with the support of vendors, their own e-government applications and share it in order to eliminate the duplication of effort

[Read More...](#)

Cases Studies

Case studies bring you an in-depth view of the projects and enable to understand the benefits of the PloneGov initiative and how we work. Members and subcommunities are invited to share their experience and submit new cases studies. Additional cases studies about Plone usage worldwide can be found on Plone.net
